Summary

Master's student in **Data Science** with a Bachelor's degree in **Statistics**. Passionate about Machine Learning, Artificial Intelligence, Predictive Analytics, and Healthcare Data Science. Experienced in developing predictive models using Python, SQL, Power BI, and statistical techniques through academic and industry projects. Interested in solving real-world business and healthcare problems using data-driven approaches.

Professional Experience

Atieh Andishan Nik Segal Novin — Data Analyst

May 2023 – Oct 2023 | Tehran, Iran

- Collected, cleaned, and analyzed sales data using Python and Excel.
- Identified sales trends and customer behavior to support business decisions.
- Prepared analytical reports and data visualizations.
- Assisted in improving sales analysis through data-driven insights.

Tamin Machine Sindad — Market Analyst

Sep 2024 – Nov 2024 | Tehran, Iran

- Conducted market research and analyzed trends in the industrial equipment sector.
- Collected and interpreted market data to support business planning.
- Prepared analytical reports and market insights for decision-making.
- Assisted in evaluating products and market opportunities.

Teaching Experience

Data Analysis & Machine Learning Instructor

2025 – Present | Tehran, Iran

- Deliver practical workshops on Python, data analysis, and introductory machine learning.
- Design project-based training materials using real-world datasets.
- Mentor learners in exploratory data analysis, data visualization, and predictive modeling.

Education

Tarbiat Modares University (TMU)

2023–2026 | M.Sc. in Data Science | Tehran, Iran

GPA: 17.66 / 20

Imam Khomeini International University (IKIU)

2018–2022 | B.Sc. Statistics | Qazvin, Iran

GPA: 16.84 / 20

Skills

Programming

- **Python** (TensorFlow, Keras, PyTorch, NumPy, Pandas, SciPy, Scikit-learn, NetworkX, Statsmodels)
- **R** (Regression, Time Series Analysis, Statistical Quality Control, Experimental Design, GLM, Data Visualization)
- **SQL** (PostgreSQL, MySQL, SQLServer)
- **Power BI / DAX** (Dashboarding, Data Modeling, Business Analytics)
- **SPSS** (Regression, Factor Analysis, Time Series, Modeling)

Notable Extra Courses

TMU

- 6-week about the EDA
- 6-week program on Exploratory Data Analysis (EDA) — Fall 2022

Notable projects

TMU

Predicting Bariatric Surgery Outcomes

- Developed RARTEN model
- Random Forest
- Elastic Net
- Healthcare Analytics

Power BI Dashboard

Interactive Dashboard

IKIU

Time Series Analysis Project

Final Undergraduate Project

- Analyzed time series data using statistical methods and forecasting techniques.
- Performed data preprocessing, trend analysis, and model evaluation using R.
